

ProtClean: AI-Powered Protein Preparation

Benefits include:

- Easy to use
- Clean data outputs
- Certainty in system construction
- Fast membrane generation and equilibration

Tidy up your PDB file like a pro!

Get your protein prep right, every time. Thanks to our AI-powered protein prep tool, you can now easily clean your PDB files in no time. With QSP Life integration, moving files from one tool to another has never been easier.

Easier to Use

Easily choose which chain(s) and cofactor(s) to include in the output. Outputs are synced to all QSP Life modules for convenience.

Membrane Generation

Complicated membrane generation and equilibration is now a thing of the past. With ProtClean, the process is simple, while producing faster results than other methods.

Cleaner Outputs

From fixing missing residues to faulty backbones, ProtClean is paving the way for improved simulations by providing cleaner data through the power of AI.

Why Choose Us

- ✓ Our team is built on quantum mechanics & AI excellence.
- ✓ Seamless integration with QSP Life, accelerating your R&D.
- ✓ Best in class support for all of your scientific and technical questions.

Data Consistency

Eliminate human error by reducing manual inputs. PDB files are cleaned in a consistent workflow that ensures you can trust the system construction.
